## ***Transaction Summary Reports***

The transaction summary reports are provided within Fish Eye for your convenience. The reports are based on information that has been submitted by persons who have been authorised to fish or do temporary transfers of entitlement under the licence.

In most cases the information provided has not been verified or audited. Records that have been entered into the Fish Eye system and are flagged as Not Fit For Purpose will not be included in this report.

It is the responsibility of the master and MFL holder to maintain good business records and ensure any errors on reports are immediately notified to the Department of Fisheries. These reports should not be relied upon as proof that the licence has entitlement available to catch or transfer because transactions shown can only represent data entered in the Fish Eye system and will not include transfers in progress or fishing trips where catch information has not been received or entered. Any errors submitted by a user will be included and so the information contained in reports may be subject to change.
