South-west freshwater angling
Recreational fishing guide 2021

Please note:
NEW South-west freshwater angling season is now open all-year round.

We're working for Western Australia.
Published April 2021
Fishing licences
A Freshwater Angling Licence is required to fish for freshwater fish in waters south of Greenough (29°S) and above the tidal influence, including all lakes, dams, rivers and their tributaries.

The licence fee covers a 12-month period from the date of issue. Anglers under the age of 16 do not require a Freshwater Angling Licence.

Fishers wishing to fish for marron need a marron licence.

Apply for a new licence, or renew an existing licence online through the Department of Primary Industries and Regional Development (DPIRD) website. Alternatively, application forms are available from select DPIRD offices and the website.

Closed waters
No fishing is permitted in the Shannon River at any time.

All drinking water supply dams managed by the Water Corporation are closed to fishing. Please contact the Water Corporation for details or visit watercorporation.com.au

Fishing methods
Anglers fishing for freshwater fish (including brown and rainbow trout, freshwater cobbler and redfin perch) may only use a single fishing rod and line or a single hand-held line.

The use of both lures and bait is permitted.

Landing net restrictions apply. Anglers may possess only a short-handled (maximum 500mm) net within 50m of the waterline of most dams and rivers all year round. This is to protect marron, which may only be taken from 8 January to 5 February annually using specific gear. Refer to the marron recreational fishing guide for permitted fishing methods.

Bag and size limits
Daily mixed species bag limit, per angler
You may take four fish (combined) of the following species:
- rainbow trout;
- brown trout; and
- freshwater cobbler.
‘Daily’ means from midnight to midnight.

Minimum size
- Rainbow and brown trout: 300mm
Fish smaller than the minimum size must be gently returned to the water immediately.

There are no bag or size limits for other freshwater fish.

To help keep WA waters pest free, please thoroughly clean and dry all fishing and wading gear before fishing in another waterway. Pest species such as carp, goldfish, tilapia and other cichlids and redfin perch destroy habitat and prey on juvenile marron and native freshwater fish. It is recommended that they are not returned to the water and are humanely euthanised, with dead fish NOT left on the shore.

For more information visit the DPIRD website or download our recreational fishing guide at fish.wa.gov.au/guide

Follow the rules
All fishing may be subject to surveillance by Fisheries and Marine Officers. If you break recreational fishing rules you may be given an infringement notice or have legal action taken against you. Fines may be as high as $5,000 plus up to 10 times the prescribed value of the species.

FishWatch – 1800 815 507
The FishWatch phone line provides a quick and easy way to report sightings or evidence of:
- illegal fishing;
- aquatic pests; and
- aquatic diseases (including fish kills).

Get involved!
You can give something back and help ensure there will be fish for the future by assisting some of our research programs. For more information on these opportunities visit the website and search under ‘volunteers’.

Send us your skeletons
You can help with vital long-term monitoring of our valuable fish stocks by sending us your fish frames (skeletons with the heads and guts intact). fish.wa.gov.au/frames

Anglers log books
Use the log book we provide to record your ocean, estuary or freshwater fishing activities. Your information will assist scientists with a number of projects. Fish tagging scientists tag and release fish to better understand population structure, movement, growth and mortality. We need people to report recaptures.
