# Recreational fishing for marron guide 2017

Licence required

**Open season 12 noon, 8 January to  
12 noon, 5 February 2017**

Fishing for marron is prohibited at all  
other times.

## **Please note:**

There are bag and possession limits and  
minimum size limits for marron.

There are different limits in 'trophy waters',  
which are managed to give fishers a chance  
to catch larger, trophy-sized marron.

PUBLISHED NOVEMBER 2016

**YOUR LICENCE FEES AT WORK**

## Legal fishing gear

You may use only one of these methods at one time.

### Drop nets

Six per licensed fisher. Nets must have marron mesh bases (mesh dimension must be 32 mm by 80 mm or greater).

Marron mesh base

### Scoop net

One per licensed fisher. Wire basket crab scoop – maximum six vertical wires, maximum 75 individual rectangles. Fine mesh nets are illegal.

### Snare

One bushman's pole snare per licensed fisher. Snares must be self-tightening only.

All other fishing gear, including any type of trap, such as the one shown, is illegal.

## Licences

You must have a licence to fish for marron and be able to produce it if required. Buy or renew your licence online at our website. Alternatively, application forms are available from our offices and the website at [www.fish.wa.gov.au](http://www.fish.wa.gov.au)

## Marron waters

Within 50 m of the waterline of marron waters:

- You may have only legal marron fishing gear in your possession.
- Net restrictions apply. Licensed freshwater anglers with a rod and line may possess only a short-handled (50 cm) trout landing net.

Marron waters include:

- **Collie River** (upstream of the Australind Bypass Road and downstream of the Wellington Dam wall, and upstream of the Mungalup Road Bridge);
- **Deep, Gardner, Warren, Donnelly, Blackwood, Capel and Preston rivers** and their tributaries;
- **Moore and Hutt rivers** and their tributaries; and
- **Murray River** (upstream from the Pinjarra weir).

## Snare-only waters

In these waters, you may use only a pole snare to take marron. All other methods are illegal. Within 50 m of the waterline you may not be in possession of any marron fishing gear except a pole snare.

Snare-only waters include:

- **Margaret River** (outside of closures – see closed waters section);
- **Big Brook Dam, Drakes Brook Dam, Glen Mervyn Dam and Logue Brook Dam;**
- **Harvey Dam** and the **Harvey River** upstream of the South Western Highway including the tributaries flowing into those waters;

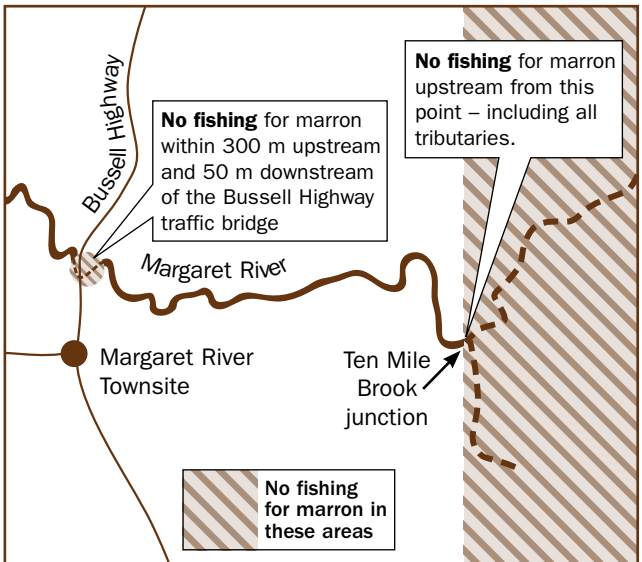

- **Waroona Dam** (Lake Navarino) and its tributaries; and
- **Wellington Dam** (all waters and tributaries upstream of the Wellington Dam wall, excluding the Collie River upstream of Mungalup Road Bridge).

## Closed waters

**Public water supply dams** – any not listed in this guide are generally closed to fishing. For details, visit the Water Corporation’s website at [www.watercorporation.com.au](http://www.watercorporation.com.au)

**Shannon River** – for marron research purposes, the Shannon River and its tributaries are closed to all fishing.

**Margaret River** – you must not fish for marron in the Margaret River and its tributaries upstream of the Ten Mile Brook junction (to protect a species known as ‘hairy marron’), or in waters within 300 m upstream and 50 m downstream of the Bussell Highway traffic bridge.

## Catch and size limits

### Trophy waters

'Trophy waters' are within 500 metres of the waterline of Harvey Dam, Waroona Dam and the Hutt River.

- Minimum legal size to keep
  - **90 mm** carapace length.
- Daily bag limit per licensed fisher
  - **5** marron.
- Possession limit – a person must not possess more than **5** marron at any time on or adjacent to trophy waters.

### All other open waters

- Minimum legal size to keep
  - **80 mm** carapace length.
- Daily bag limit per licensed fisher
  - **8** marron.
- Possession limit – **16** marron.

**Please note:** The daily bag limit applies from noon to noon the next day. 'Possession limit' means you may only accumulate your daily bag limits up to this number. A possession limit applies everywhere except in your principal place of residence.

## Protecting marron

The marron fishery is unique because it is purely for recreational fishers. However, over time, the total catch has declined greatly due to a combination of environmental factors and fishing pressure. The fishing rules are in place to help protect vulnerable breeding populations so that we'll have marron in the future.

You must measure each marron as soon as you catch it, then immediately and carefully return to the water:

- undersize marron; and
- female marron carrying eggs or young.

Also, please dispose of rubbish and old bait properly – don't leave waste on the bank of a river or dam. In addition, keep in mind that you share the marron fishery. Nobody owns the shoreline, so don't stake out big 'territories'.

## How to measure a marron

Illustration © R.Swainston/www.anima.net.au

Measure from the tip of the horn on the marron's forehead (A) to the back edge of the carapace (B). If the gauge fits over the back of the carapace, and is even slightly loose, the marron is too small and must be returned to the water. Measure accurately using an approved gauge, available from tackle shops. Measuring with anything else, such as a drink can or ruler, can lead to mistakes.

## Boats and diving

It is illegal to use diving gear or boats (including canoes, etc.) to catch marron, or to transport marron scoop nets or drop nets by boat.

To fish in areas not accessible by land, fishers may transport marron scoop nets or drop nets by boat only on the Donnelly River downstream of the boat landing. This privilege will be revoked if abused. Fishing from a boat is still illegal.

## Transporting marron

Marron caught during open season must be taken to your residence by midnight on the last day of the season.

During the closed season, it is illegal to transport marron grown on private property (because they are hard to distinguish from marron taken illegally). If you have bought marron from a licensed facility you must keep your receipt as proof of purchase. This helps to protect the marron aquaculture industry, which is licensed to grow and sell marron to restaurants and the public.

### **Catch care**

Keep your marron alive in a shaded, damp sack until you are ready to cook them. Don't use a bucket of water as it will quickly become polluted and suffocate them.

Place marron in the freezer for a few minutes to anaesthetise them before killing and cooking them.

To kill a marron, insert a sharp knife between the eyes and cut through the centreline of the head and thorax (splitting) in one quick movement.

### **Follow the rules**

All fishing may be subject to surveillance by Fisheries and Marine Officers. If you break recreational fishing rules you may be given an infringement notice or have legal action taken against you. Fines may be as high as \$5,000 for an individual plus up to 10 times the prescribed value of the species.

### **About this guide**

This publication is to provide assistance or information. It is only a guide and does not replace the *Fish Resources Management Act 1994* or the *Fish Resources Management Regulations 1995*. It cannot be used as a defence in a court of law. The information provided is current at the date of printing but may be subject to change. For the most up-to-date information on fishing and full details of legislation contact your local Department of Fisheries office or visit [www.fish.wa.gov.au](http://www.fish.wa.gov.au)
